

77QL

MORTICE LOCKS
FOR SLIDING GATES

PRODUCT:

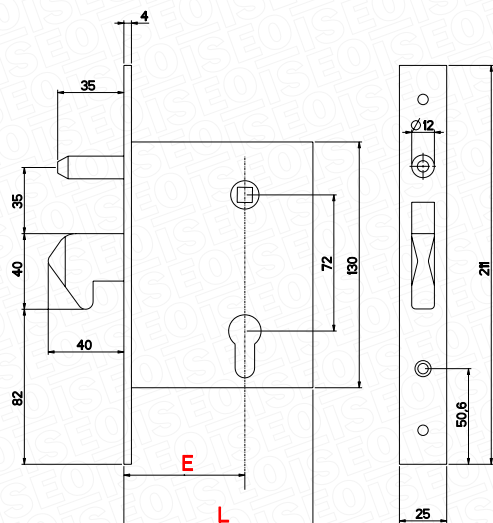

77QL is a classic lock for mechanical sliding gates. One of the most common applications for this type of lock is for gates delimiting the exterior grounds of homes and condominiums.

OPERATION:

The handle lifts the sprung hook bolt
The key locks/unlocks the hook and the handle

RANGE:

- Mortice lock with sprung hook bolt

TEXT FOR SPECIFICATIONS:

Mortice lock for mechanical gates with spring hook bolt with 40 mm protrusion. The 12 mm diameter fixed pin ensures that the gate is locked securely by preventing it from being lifted. A handle lifts the hook and pulls the gate. The 4x25x211 mm faceplate ensures protection for the lock.
